SUMMARY

I am a second-year Math and Computer Science student with a strong desire to work in big tech. Known for my outgoing and fun personality, I excel in roles that require both technical skills and interpersonal interaction. I have experience working part-time and interning in various roles that combine my technical expertise with my ability to engage and collaborate with others. Furthermore, I am always finding ways to improve myself – taking Courses online and starting my own projects. My drive to succeed and ability to connect with people make me a dynamic and valuable team member
